

CETIE AI Configurator

End-to-end pipeline · Data ingestion → Vector indexing → Retrieval → AI generation

Deployed on:

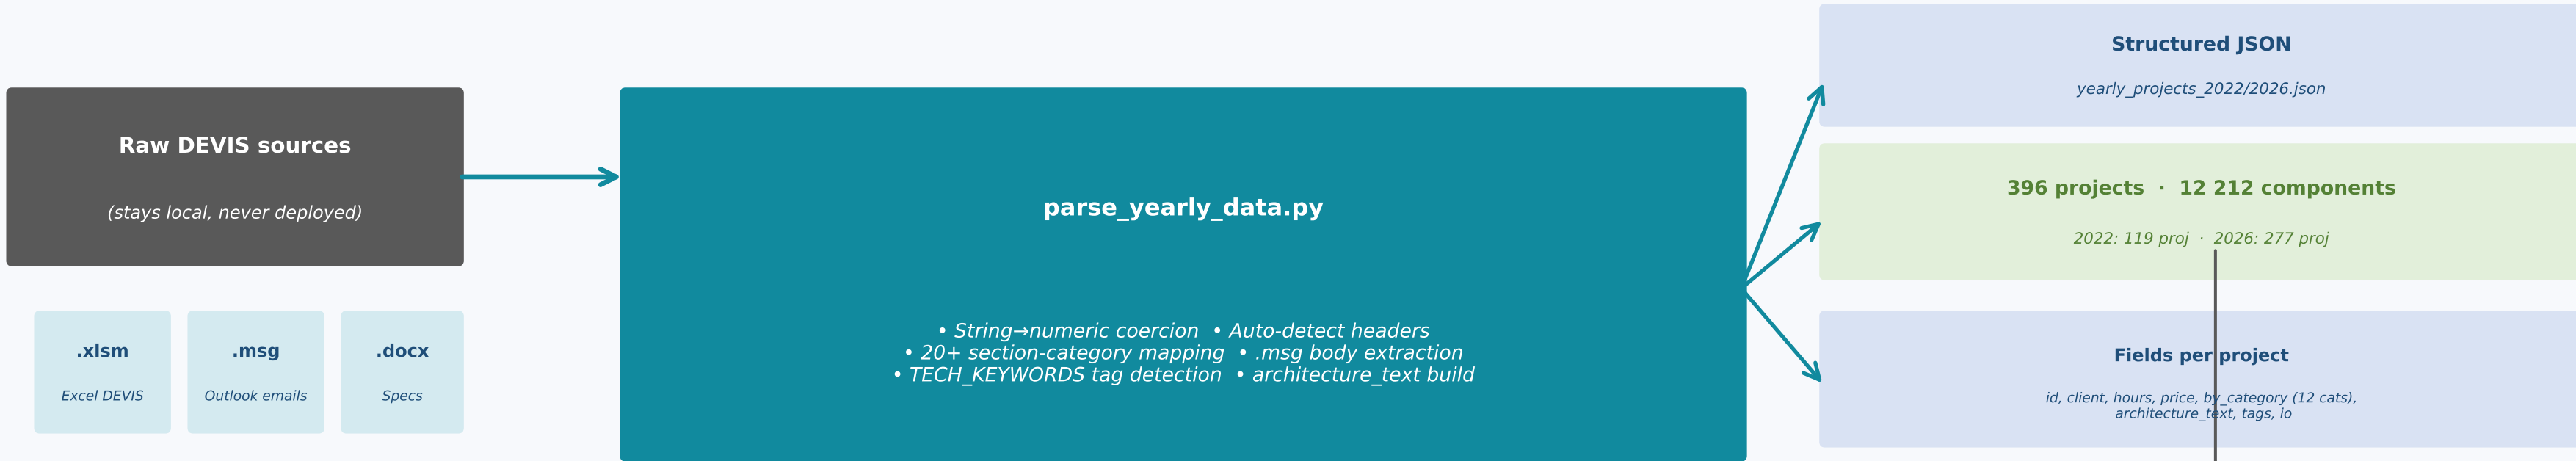

NEW

= recent improvement (April 2025) · **Bender** · **\$7/mo** · **Frankfurt**

1

DATA INGESTION

parse_yearly_data.py → poc/data/yearly_projects_YYYY.json

2

VECTOR INDEXING [3 chunks per project]

rag.py build_yearly_index → ChromaDB (cosine, text-embedding-3-small)

3

RETRIEVAL

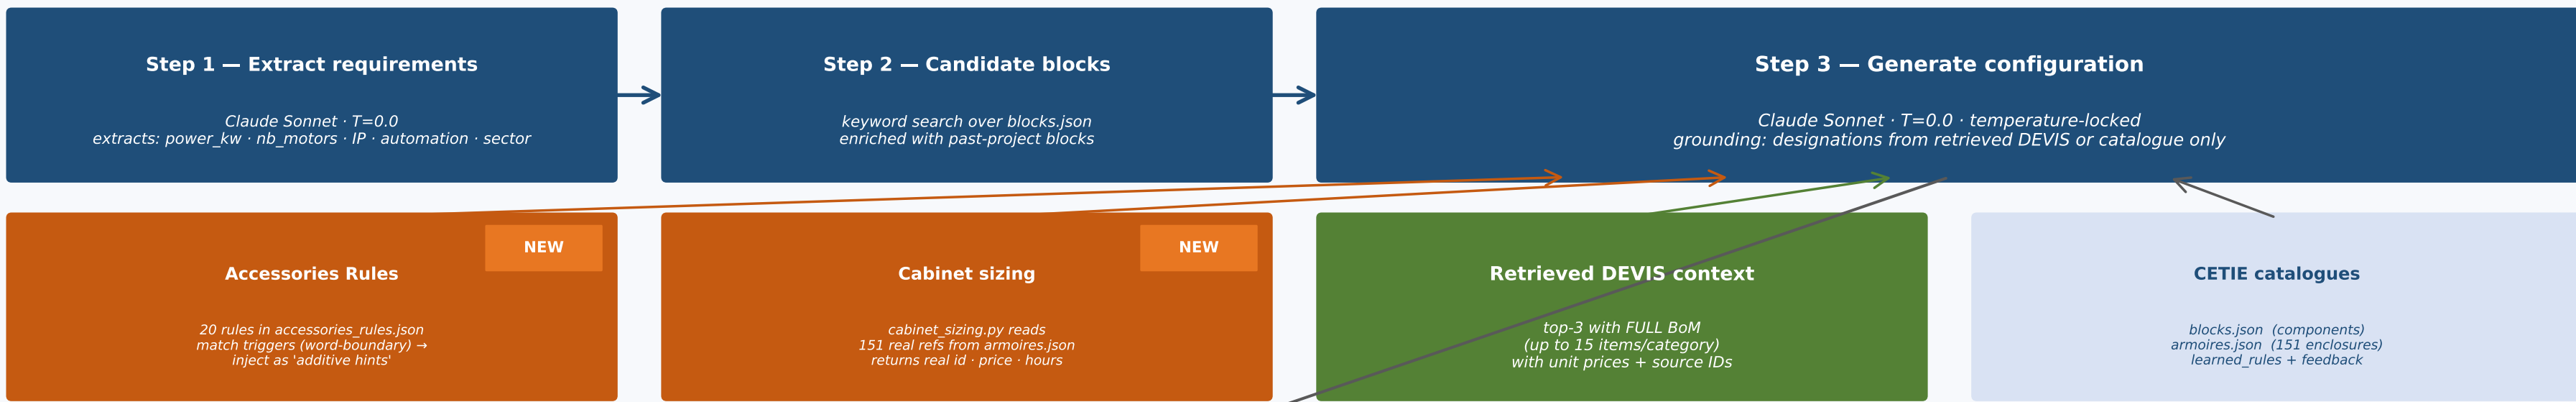

embed query → nearest-neighbour search → temporal re-rank → dedup per project

4

AI GENERATION (app.py · Claude Sonnet 4.6)

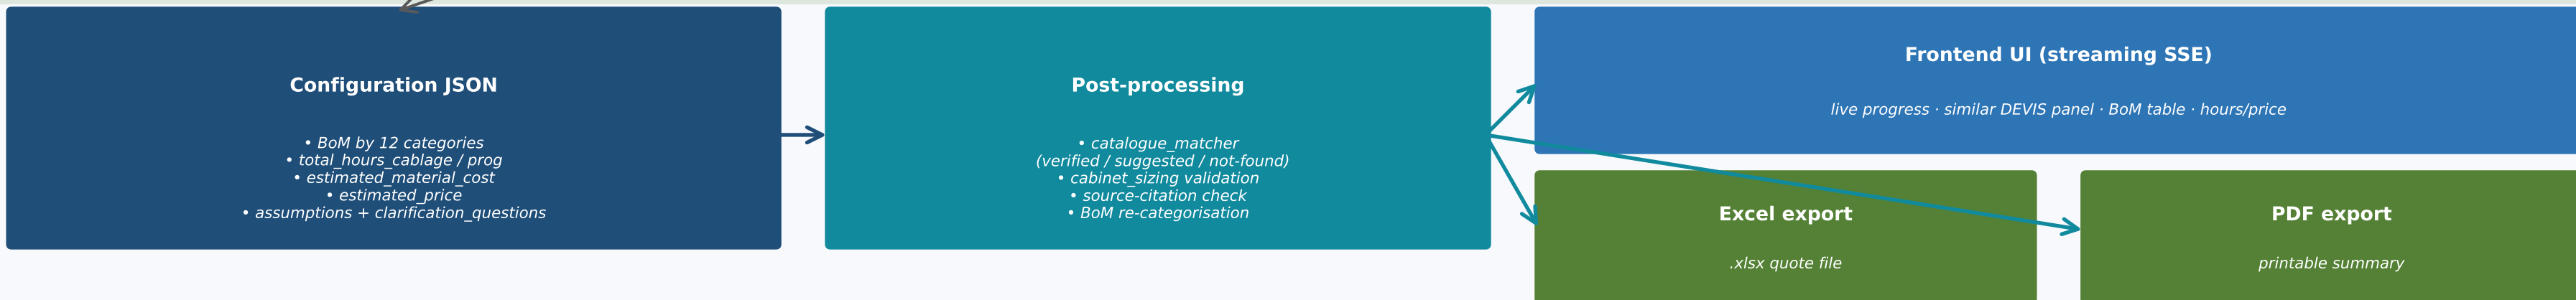

requirements extraction → component search → configuration generation

5

OUTPUT & VALIDATION

configuration → post-processing → UI + export

Validation & Test Infrastructure
